## The Fundamentals

### 1. Programming Your Unconscious Mind

First is the **‘soil’**. With the soil you can grow and produce anything. The **‘soil’** is what makes you unique. It is who you are. It is your identity. It is what creates your thinking. It is how you see your world and how you represent and evaluate everything you do. It is the foundation on which you build your business and career.

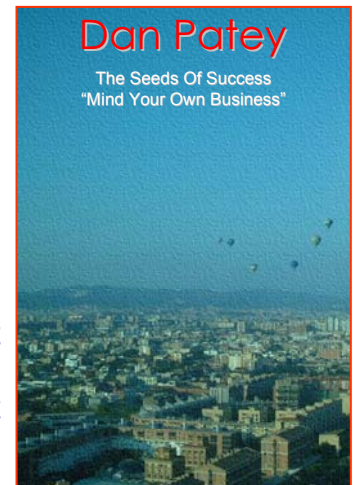

### 2. Feed Your Conscious Mind

Second are the **‘roots’**. With the **‘roots’** you can produce anything. The **‘roots’** are what makes it possible for you to communicate, feel and create your sensitivity. It is the way you feel your emotions, your values, your beliefs, which makes you capable to decide the actions to take and how to represent your world. It creates your world and the way you represent all that happens to you.

Below is what you will see when you first look at the front cover of the book.

### 3. Nurturing Your Surface World

Third is the **‘plant’**. With the plant you can produce anything. The **‘plant’** is what makes it possible for everything to be harvested and provide you with contribution. It is the way you share who you are. It provides giving and receiving. It creates your humanity, which creates your identity and how you associate with your world. It creates your decisions, actions and behavior. The plant is all the assets and resources you have in your business.

### 4. Contribution from Your Environment

Finally is the **‘environment’**. With the right support environment you can produce an abundant harvest. The environment of wind, rain and sun is what makes it possible for everything to be nourished on the outside, to feed and provide support. It is the way you show who you are. It is you, your friends, your associates, your stakeholders, your clients and customers. It is what makes you so special, living in an abundant world creating relationships and communicating every action you take. The more you create, the more you are adding to the environment so it continues to grow and serve everything for your continued growth and prosperity.

The book is illustrated by the flight of hot air balloons flying over Barcelona, which uses air currents to guide them to their final destination.

This is a great Metaphor for how ‘Minding Your Own Business’ can and will be like.

**What Is The Value Of One Day Of Your Life?**  
**Why Are You Settling For Less Than The Very Best?**

Someone once asked me a key question -  
If you could buy a special book that would show you how to become rich and wealthy in your lifetime', how many people do you think would go out straight away and buy the book?  
**Very Few!**  
Why is that?  
**No one really knows!**

It's a mystery that has yet to be discovered.  
Which group do you belong to?  
Change happens in a moment when you decide, take action and follow through on what you believe in.
